

Cape Town Water Conservation

Cape Town has **water restrictions** in place.

Each person is allotted
50 LITERS
(13 gallons)
per day

An average American uses
300-380 LITERS
(80-100 gallons)
of water per day

Save water by taking these key actions

Only flush when necessary.
Don't use it as a dustbin.
"If it's yellow let it mellow,
if it's brown flush it down."

Take a short 90-second shower;
collect your shower water in a
bucket and re-use it to flush your
toilet as a priority.

Wait for a full load before
running washing machines.
Machine use limited to every
10 days for each student.

Drink bottled water to
save tap water for other
purposes.

Questions?

Contact Marsha Lipari

Use a cup instead of running
taps for brushing teeth, shaving,
drinking, etc.
